**INTERIM FINANCIAL REPORT**

**Notes:-**

**Disclosure requirements pursuant to FRS 134 – paragraph 16**

The Condensed consolidated interim financial statements should be read in conjunction with the audited financial statements of the Group for the year ended 30 June 2019.

**A1. Accounting Policies and Methods of Computation**

The interim financial report is unaudited and has been prepared in accordance with Malaysian Financial Reporting Standard (“MFRS”) 134: “Interim Financial Reporting” and Chapter 9, part K paragraph 9.22 of the Main Market Listing Requirements of the Bursa Malaysia Securities Berhad (“Bursa Securities”).

The explanatory notes contained herein provide an explanation of the events and transactions that are significant to the understanding of the changes in the financial position and performance of the Group since the financial year ended 30 June 2019.

The accounting policies and methods of computations adopted by the Group in this interim financial report are consistent with those adopted in the annual audited financial statements for the financial year ended 30 June 2019, except for changes arising from the adoption of MFRS 16 “Leases” as described below:

MFRS 16 “Leases” (“MFRS 16”)

MFRS 16 supersedes MFRS 117 “Leases” (“MFRS 117”) and the related interpretations. Under MFRS 16, a lease is a contract (or part of a contract) that conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

MFRS 16 eliminates the classification of leases by the lessee as either finance leases (on balance sheet) or operating leases (off balance sheet). MFRS 16 requires lessee to recognise “right-of-use” of the underlying asset and a lease liability reflecting future lease payments for leases. The right-of-use asset is depreciated in accordance with the principle in MFRS 116 ‘Property, Plant and Equipment’ and the lease liability is accreted over time with interest expense recognised in the Income Statement.

The Group applies MFRS 16 using the modified retrospective approach, therefore the comparative information was not restated and continues to be reported under MFRS 117 and IC Interpretation 4 “Determining Whether an Arrangement Contain a Lease” (“IC 4”). The retrospective impact of applying MFRS 16 for the leasing contracts assessed to be relevant to MFRS 16 as at 1 July 2019 is adjusted to the Group’s retained earnings as at 1 July 2019.

The purchases and sales of rights to access and rights to use licenses of intellectual property are excluded from the scope of MFRS 16.

[THE REST OF THIS PAGE IS INTENTIONALLY LEFT BLANK]

**INTERIM FINANCIAL REPORT**

**Notes: - continued**

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Group's incremental borrowing rate. Generally, the Group uses its incremental borrowing rate as the discount rate. Subsequently, the lease liability is measured at amortised cost using the effective interest rate method, re-measured when there is a change in the Group's estimates of future lease payments arising from changes in circumstances relating to the contractor if the Group changes its assessment of whether it will exercise a purchase, extension or termination options.

For leases previously classified as finance leases the Group recognised the carrying amount of the lease asset and lease liability immediately before transition as the carrying amount of the right of use asset and the lease liability at the date of initial application.

In such re-measurements, a corresponding adjustment is made to the carrying amount of the right-to-use asset, or is recorded in Income Statement if the carrying value of the right-of-use asset has been reduced to zero.

The Group has elected to not recognise right-of-use assets and lease liabilities for short-term leases that have a lease term of 12 months or less at inception or at the initial application of MFRS 16 and low-value assets. The Group recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

The adoption of MFRS 16 impacts the Group's performance in the current financial year as below:

- (a) On the Income Statement, expenses which previously included leasing expenses within Earnings before Interest, Tax, Depreciation and Amortisation ("EBITDA") were replaced by interest expense on lease liabilities and depreciation of the right-of-use assets.
- (b) On the Statements of Cash Flows, operating lease rental outflows previously recorded within "net cash flows from operating activities" were reclassified as "net cash flows used in financing activities" for repayment of principal and interest of lease liabilities.

For lessors, MFRS 16 retains most of the requirements in MFRS 117. Lessors continue to classify all leases as either operating leases or finance leases and account for them differently.

For the current financial year under review, the Group revenue was at RM19,166.9 million as compared to RM18,047.5 million, recorded in the preceding financial year ended 30 June 2019. The Group profit before taxation for the current financial year stood at RM430.0 million. This represents a decrease of RM606.6 million or 58.5% as compared to a profit of RM1,036.5 million recorded in the preceding year corresponding period. However, after eliminating the losses arising from fair value changes, impairment loss and inventories write down of RM226.2 million, the Group recorded a profit before tax of RM656.2 million for the current financial year.

For the current financial quarter under review, the Group revenue was RM3,524.9 million as compared to RM5,091.7 million, recorded in the preceding year corresponding quarter. The Group recorded a loss before tax of RM124.9 million for the current financial quarter. This represents a decrease of RM319.1 million or 164.3% as compared to a profit of RM194.2 million recorded in the preceding year corresponding quarter. However, after eliminating the losses arising from fair value changes, impairment loss and inventories write down of RM170.4 million, the Group recorded a profit before tax of RM45.5 million for the current financial quarter.

**INTERIM FINANCIAL REPORT**

**Notes – continued**

With the easing of the Government’s movement control order (“MCO”) which commenced on 18 March 2020, the Group’s construction and cement segments re-commenced its operations in stages, as permitted. The Utilities segment which services are essential continued to operate throughout the control period. The direct impact of the Covid-19 pandemic is reflected in the performance of the respective operating business segments for the financial quarter/year ended 30 June 2020 as compared to the preceding year corresponding quarter/year analysed as follows:

Construction

For the current financial quarter under review, the increase in revenue was principally due to the significant increase in progress of construction works. However, the lower profit before tax was mainly due to higher finance costs and overheads incurred.

For the current financial year under review, the increase in revenue and profit before tax was principally due to the significant progress in construction works during the financial year.

Information technology & e-commerce related business

For the current financial quarter under review, the lower revenue was primarily due to the lower revenue recorded by the content and digital media division following the impact of Covid-19. However, the loss before tax was mainly due to an impairment loss on goodwill.

For the current financial year under review, decrease in revenue and profit before taxation were mainly due to the reasons mentioned above.

Cement Manufacturing & trading

For the current financial quarter under review, decrease in revenue was caused by the contraction in domestic cement demand that was compounded by the MCO which resulted in the shut down of operations during this period whilst the loss before tax was mainly due to higher allowance for impairment of receivables and higher finance costs related to the acquisition of Malayan Cement Berhad (“MCB”) (formerly known as Lafarge Malaysia Berhad).

For the current financial year under review, the increase in revenue was mainly due to consolidation of MCB. Despite the higher revenue, the loss before tax was mainly due to reasons mentioned above.

Property investment & development

For the current financial quarter/year under review, the decrease in revenue was mainly due to the deconsolidation of the results of Starhill Global Real Investment Trust (“SGREIT”) in which the Company and its subsidiary companies’ in aggregate hold 37.48% of the units and lower sales recorded in The Fennel project undertaken by Sentul Raya Sdn. Bhd. and the 3-Orchard By-The-Park project undertaken by YTL Westwood Properties Pte. Ltd (“YTL Westwood”). However, the higher loss before tax was mainly attributable to the recognition of losses on sale of completed units and qualifying certificate extension fees incurred by YTL Westwood for the 3 Orchard By-The-Park project and share of fair value loss on investment properties recorded by SGREIT.

**INTERIM FINANCIAL REPORT**

**Notes – continued**

Management services & others

For the current financial quarter/year under review, decrease in revenue was mainly due to lower distribution income from investments and the drop in interest income following the drop in interest rates in most jurisdictions that the Group operates. Despite the lower revenue, profit before tax was higher primarily due to a one-off gain on deconsolidation of SGREIT which was partially offset by the share of losses of an associated company.

Hotels

For the current financial quarter/year under review, the decrease in revenue and profit before tax was significantly impacted by the lower operating results from most of the Group's hotel businesses amid extremely challenging conditions due to the unprecedented disruption caused by the Covid-19 pandemic. Country borders in most jurisdictions in which the hospitality businesses operate were closed to foreign travelers. Seminars and meetings were restricted due to social distancing measures and adherence to standard operating procedures issued by governments in these jurisdictions.

Utilities

For the current financial quarter under review, the performance of the divisions within the Utilities segment is set out below:

- For the Power Generation (Contracted) business, lower revenue was mainly due to the lower energy payment recorded. However, the impact on profit before taxation was minimal as the plant operates under a guaranteed capacity payment regime.
- Multi utilities business (Merchant) division recorded lower revenue primarily due to the decrease in fuel oil price and lower retail volume recorded. However, the improvement in loss before taxation was mainly due to the higher fuel oil tank leasing rate, higher retail and ancillary margin and lower finance costs.
- Water & sewerage division recorded lower revenue primarily due to the decrease in price as determined by the regulator. The higher allowance for impairment of receivables of RM62.5 million (GBP11.8 million) [2019: RM26.7 million (GBP5.0 million)] resulting from a review of the potential impact of the Covid-19 pandemic on customers and lower revenue as mentioned above contributed to a lower profit before tax. It should be noted that once such impairments are realized the regulatory regime allows for recovery against future tariffs
- Telecommunications division recorded lower revenue and higher loss before taxation primarily due to lower project revenues recorded. However, the EBITDA of this division is positive.

For the current financial year under review, performance of the respective operating business divisions was consistent with the notes mentioned above with the exception of the Multi utilities business (Merchant) and Water & sewerage divisions:

- Multi utilities business (Merchant) division recorded lower revenue primarily due to the decrease in fuel oil price and lower generation of unit sold, partially offset by higher sales of fuel oil. However, the improvement in loss before taxation was mainly due to absence of one-off charge for impairment of receivable recognised in the preceding year, lower finance costs recorded in the current year and higher retail and tank leasing margin.

**INTERIM FINANCIAL REPORT**

**Notes – continued**

- Water & sewerage division contributed a higher revenue primarily due to the differing weather conditions leading to changes in supply volume and partially offset by decrease in price as determined by the regulator. The higher allowance for impairment of receivables of RM113.8 million (GBP21.5 million) [2019: RM70.1 million (GBP13.1 million)] resulting from a review of the potential impact of the Covid-19 pandemic on customers and decrease in prices as determined by the regulator as mentioned above contributed to a lower profit before tax. It should be noted that once such impairments are realised the regulatory regime allows for recovery against future tariffs.

The decrease in revenue and profit before tax was mainly due to the lower profit from Water & sewerage division, loss recorded in the Telecommunications business division and partially offset by better performance in Multi utilities business (Merchant) segment.

**B2. Comparison with Preceding Quarter**

	<b>Current Quarter 30.06.2020 RM'000</b>	<b>Preceding Quarter 31.03.2020 RM'000</b>	<b>Variance % +/-</b>
Revenue	3,524,912	4,813,551	-27%
(Loss)/Profit before taxation	(124,859)	183,901	->100%
(Loss)/Profit attributable to owners of the parent	(252,226)	29,524	->100%

The decrease in revenue and loss before tax was primarily attributable to lower profit recorded across all segments, partially offset by a one-off gain on deconsolidation of SGREIT. The loss after tax for the current quarter under review arose substantially from the recognition of deferred tax expenses arising from the increase in corporation tax rate in the United Kingdom from 17% to 19% as disclosed in Note B7.

**B3. Audit Report of the preceding financial year ended 30 June 2019**

The Auditors' Report on the financial statements of the financial year ended 30 June 2019 did not contain any qualification.

**B4. Prospects**

Globally, businesses are facing unprecedented social and economic challenges following the Covid-19 pandemic. Countries where the Group operates have implemented various movement control regulations and laws and limited the operation of non-essential services. However, the Group's businesses have been cushioned by its Utilities segment which by its nature are essential services that have continued to operate throughout the control period. The construction and cement segments have re-commenced in stages as permitted and operations have normalised. The impact of the coronavirus pandemic in the longer term cannot be accurately estimated as there are still significant uncertainties on how and when the pandemic can be contained and full business activities resume.

**INTERIM FINANCIAL REPORT**

**Notes – continued**

Construction

The Covid-19 pandemic and the unprecedented enforcement of the movement control order (MCO) had impacted the construction segment with the sudden suspension of its activities. Operations have since re-commenced, but under strict standard operating procedures, which have disrupted operational efficiency, resulted in sub-optimal utilisation of assets and the dislocation of resources.

Management has been proactive in taking actions to mitigate the delays and has also implemented stringent cost control measures. Notwithstanding, this segment is expected to contribute positively based on its current order book.

Information technology & e-commerce related business

This segment whose contribution is insignificant to the Group will have minimal impact to the Group's prospects even when the economy recovers from the Covid-19 pandemic.

Cement manufacturing & trading

The short-term outlook remains challenging due to the impact of the Covid-19 pandemic on public and private plans for new investments. Notwithstanding, the solid dynamics of its main markets remain intact and management is confident that the key growth drivers, e.g. infrastructure requirements and demand for housing from urbanization, will continue to underpin demand growth. The Cement division will also increase export volumes from its dedicated Langkawi production facility.

Property investment & development

As a result of the unprecedented situation, it is not possible to forecast with any accuracy at this stage how the current shutdown will impact on the property market and consumer demand for property products. Notwithstanding, the Group will continue to embark on marketing efforts and initiatives to unlock sales as well as undertake project launches.

Management services & others/Hotels

The short-term outlook for the hospitality industry remains challenging. Demand from international business and leisure travelers is expected to remain subdued until containment of the pandemic, after which we expect pent-up demand to fuel recovery. In the near term, demand is expected to come from the substitution of international travel with local travel due to restrictions on overseas travel.

Utilities

The YTL Power Group has an 80% equity interest in PT Tanjung Jati Power Company ("TJPC"), an independent power producer which is undertaking the development of Tanjung Jati A, a 2 x 660 megawatt coal-fired power project in Java, Indonesia. TJPC has a 30-year power purchase agreement with PT PLN (Persero), Indonesia's state-owned electric utility company, amended and restated in December 2015 and March 2018. In February 2020, TJPC obtained the Business Viability Guarantee Letter from the Ministry of Finance of the Republic of Indonesia and is working towards achieving financial close.

**INTERIM FINANCIAL REPORT**

**Notes – continued**

The YTL Power Group also has a 45% equity interest in Attarat Power Company (“APCO”), which is developing a 554 megawatt (gross) oil shale fired power generation project in the Hashemite Kingdom of Jordan. APCO has signed a 30-year Power Purchase Agreement (including construction period of 3.5 years) with the National Electric Power Company (“NEPCO”), Jordan’s state-owned utility, for the entire electrical capacity and energy of the power plant, with an option for NEPCO to extend the Power Purchase Agreement to 40 years (from the commercial operation date of the project’s second unit). Construction has commenced on the project with commercial operations for the first unit scheduled to commence in the middle of this year and the second unit in the last quarter of the year. However, the global Covid-19 pandemic has led to a delay in the project due to travel and movement restrictions imposed by the Government of Jordan. APCO has invoked the force majeure provisions under the Power Purchase Agreement with NEPCO. As the effects of Covid-19 are still on-going, the force majeure provisions are still in effect.

YTL Power Generation Sdn. Bhd. (“YTLPG”) re-commenced operations on 1 September 2017 for the supply of 585MW of capacity from its existing facility in Paka for a term of 3 years 10 months, which will be expiring on 30 June 2021. YTLPG is expected to perform satisfactorily as it operates under a Power Purchase Agreement (“PPA”).

The electricity market in Singapore is expected to remain competitive, driven by volatilities across global markets and generation capacity oversupply in the wholesale electricity market. Despite the current challenges, this segment will continue to focus on customer service and diversification beyond the core business into integrated multi-utilities supply. The proposed acquisition of Tuaspring announced on 12 March 2020 is a logical extension of the Group’s existing multi utilities operations. The power plant and associated assets of Tuaspring, which is the newest combined cycle power plant in Singapore, will be integrated into existing businesses and upon completion, is expected to contribute positively to the future earnings of the Group.

In response to the Covid-19 pandemic, Singapore implemented heightened safe distancing measures from 7 April 2020 to 1 June 2020, locally known as "circuit breaker" measures. During circuit breaker, Singapore's electricity demand came down due, inter alia, to closure of public premises and workplaces for non-essential services. YTL PowerSeraya is closely monitoring the situation, including customers' electricity consumption and revenue collections. The Singapore government will be cushioning the impact of Covid-19 on businesses, with payouts to help cover employer's manpower costs as well as providing property tax rebates. Electricity demand has since recovered, but is still lower than pre-Covid-19 levels. However, as power generation is an essential service, YTL PowerSeraya is confident of recovery post pandemic.

As for the Water & Sewerage division, from 1st April 2020 Wessex Water will be working towards investment commitments agreed with the regulator as part of its Price Review 2020-2025 (“PR19”). Over the last 5 years, Wessex Water’s investment in its regulated assets base (“RAB”) increased from RM15.11 billion (GBP2.75 billion) to RM17.79 billion (GBP3.35 billion). The RAB value is expected to increase to RM20.66 billion (GBP3.89 billion) at the end of the period, 31 March 2025 following the investment commitments agreed for PR19.

**INTERIM FINANCIAL REPORT**

**Notes – continued**

Whilst this next period commencing from 1 April 2020 will see a shift from current levels of performance, the Group remains committed to delivering high quality, reliable and resilient services that are affordable to everyone. It is confident it will continue to deliver outperformance against these new targets.

With the existing network in place, the Telecommunications division will continue to expand its telecommunications infrastructure business and is well positioned to grow its subscriber base with innovative, competitive and affordable products and services. The outbreak of the Covid-19 pandemic and the enforcement of the MCO by the Government meant that all schools were closed and education disrupted. Arising from this YTL Communications and FrogAsia collaborated with YTL Foundation, a not-for-profit foundation funded principally by the YTL Group, to launch the Learn from Home Initiative in March 2020 to enable students to learn from home during this period. Under the initiative, YTL Foundation provided free Yes 4G SIM cards with 40GB of data to students registered in government schools and certain tertiary education institutions and also provided free mobile phones and YES 4G internet data plans to students from B40 families, thereby ensuring students have free access to sufficient data for online learning. Online learning resources and lessons were also provided by FrogAsia to facilitate learning from home. In view of the overwhelming response to the Learn from Home Initiative, YTL Communications hopes to be able to continue serving this underserved community with affordable plans.

Despite the challenging outlook, the Group expects the performance of its business segments to remain resilient as these segments' operations are substantially essential in nature. The Group will continue to closely monitor the related risks and impact on all business segments.

Other than the above items, there were no other investment income, write off of receivables, gain or loss on disposal of properties, impairment of assets and exceptional items for the current financial quarter and financial year to date.

**B7. Taxation**

Taxation comprise the following:-

	<b>Current Quarter 30.06.2020 RM'000</b>	<b>Year To Date 30.06.2020 RM'000</b>
In respect of current period/year		
- Income tax	9,518	274,332
- Deferred tax	187,782	151,907
	<u>197,300</u>	<u>426,239</u>

The higher effective tax rate of the Group as compared to the Malaysian statutory income tax rate for the current financial quarter and financial year to date was mainly attributable to the UK Corporation Tax rate now remaining at 19% for 2020-21 after repeal of the previous legislation that reduced the rate to 17%. Consequently, the deferred tax balances as at 30 June 2020 were remeasured at that date which resulted in a debit to the income statement of RM162.4 million and losses from certain subsidiary companies, non-deductibility of certain expenses for tax purposes and partially offset by income subjected to different tax jurisdictions.

**B8. Corporate Developments**

**Corporate Proposals Announced and Pending Completion**

As at the date of this report, being the latest practicable date, there are no corporate proposals announced and pending completion, save for the following:-.

- (i) On 12 March 2020, YTL Power and Taser Power., entered into a put and call option agreement with Tuaspring Pte. Ltd. (“Tuaspring”) for the proposed acquisition of the power plant and associated assets of Tuaspring by YTL PowerSeraya Pte. Limited, from the receivers and managers of Tuaspring, for a total purchase consideration of SGD 331,450,000 to be settled as to SGD 230,000,000 in cash and SGD 101,452,000 comprising ordinary shares and loan notes amounting to 7.54% of the post-acquisition equity in YTL Utilities (S) Pte. Limited, the immediate holding company of YTL PowerSeraya Pte. Limited (“Proposed Acquisition”).

Approval for the Proposed Acquisition from the Energy Market Authority of Singapore was received on 20 May 2020. Completion is conditional inter alia on approval of the Public Utilities Board of Singapore and completion of financing arrangements. All approvals are expected to be received within three months.

- (ii) On 29 April 2020, CIMB Investment Bank Berhad announced on behalf of the Company, the proposal to establish and implement a new employees share option scheme (“ESOS”) (“2020 ESOS”) for the eligible employees and directors of the Company and/or its subsidiaries (“Proposed ESOS”).

The Company has in place an existing ESOS that was implemented on 1 April 2011 with a duration of 10 years which will be expiring on 31 March 2021 (“Existing Scheme”).

In accordance with the provisions of the Main Market Listing Requirements (“MMLR”) of Bursa Malaysia Securities Berhad (“Bursa Securities”), a listed issuer may implement more than one scheme provided that the aggregate number of new ordinary shares in the Company available under all the schemes (i.e. the aggregate of outstanding options under the Existing Scheme together with options to be granted under the 2020 ESOS) does not exceed 15% of the Company’s total number of issued shares (excluding treasury shares) at any one time, in compliance with the requirements under Paragraph 6.38 of the MMLR.

On 18 June 2020, Bursa Securities granted the Company an extension of time until 16 November 2020 to issue the circular in relation to the Proposed ESOS. The Company intends to convene the extraordinary general meeting for the Proposed ESOS on the same day as its forthcoming annual general meeting to be held later this year.

The Proposed ESOS is pending completion.

**B10. Derivatives Financial Instruments, Fair Value Changes of Financial Liabilities and Fair Value hierarchy**

(a) Derivatives Financial Instruments

As at 30 June 2020, the Group's outstanding derivatives are as follows:

<b>Type of Derivatives</b>	<b>Contract/Notional Value RM'000</b>	<b>Fair Value RM'000</b>
<b><u>Fuel oil swaps</u></b>		
- Less than 1 year	1,251,463	(119,490)

- Less than 1 year	1,154,571	18,806
- 1 year to 3 years	276,176	522
- More than 3 years	-	-

The Group entered into fuel oil swaps to hedge highly probable forecast physical fuel oil and natural gas purchases that are expected to occur at various dates in the future. The fuel oil swaps have maturity dates that match the expected occurrence of these transactions.

The Group entered into currency forwards to hedge highly probable forecast transactions denominated in foreign currency expected to occur in the future. The currency forwards have maturity dates that match the expected occurrence of these transactions.

The Group entered into interest rate swap contracts to manage its interest rate risk arising primarily from interest-bearing borrowings. Borrowings at floating rate expose the Group to fair value interest rates and the derivative financial instruments minimise the fluctuation of cash flow due to changes in the market interest rates.

The derivative financial instruments are stated at fair value based on banks' quotes. The fair value changes on the effective portion of the derivatives that are designated and qualify as cash flow hedges are recognised in other comprehensive income. The gain or loss relating to the ineffective portion is recognised immediately in profit or loss.

All derivative financial instruments are executed with creditworthy counter parties with a view to limit the credit risk exposure of the Group.

(c) Fair Value Hierarchy

The table below analyses financial instruments carried at fair value, by valuation method. The different levels have been defined as follows:

- (a) Level 1 : Quoted prices (unadjusted) in active markets for identical assets or liabilities.
- (b) Level 2 : Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. prices) or indirectly (i.e. derived from prices).
- (c) Level 3: Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

At the reporting date, the Group and the Company held the following financial instruments carried at fair value on the statement of financial position:-

	Level 1 RM'000	Level 2 RM'000	Level 3 RM'000	Total RM'000

**B13. Earnings Per Share**

**ii) Diluted earnings per share**

The diluted earnings per share of the Group has been computed by dividing the net profit attributable to owners of the parent for the financial quarter/year by the weighted average number of ordinary shares in issue during the financial quarter/year as set out below:-

	Individual Quarter		Cumulative Quarter	
	Current Year Quarter 30.06.2020	Preceding Year Corresponding Quarter 30.06.2019	12 Months Ended 30.06.2020 30.06.2019	
(Loss)/Profit attributable to owners of the parent (RM'000)	(252,226)	(13,816)	(189,855)	242,589
<i>Weighted average number of ordinary shares - diluted ('000)</i>				
Weighted average number of ordinary shares-basic	10,568,697	10,677,728	10,648,839	10,569,956
Effect of unexercised employees share option scheme ("ESOS")	-	-	-	-
	<u>10,568,697</u>	<u>10,677,728</u>	<u>10,648,839</u>	<u>10,569,956</u>
Diluted earnings per share (sen)	(2.39)	(0.13)	(1.78)	2.30

*Total cash expected to be received in the event of an exercise of all outstanding ESOS options is RM520.959 million (2019: RM529.465 million). Accordingly, the Net Asset ("NA") on a proforma basis will increase by RM520.959 million (2019: RM529.465 million) resulting in an increase in NA per share of RM0.05 (2019: RM0.05). In arriving at the diluted earnings per share, NA and NA per share, no income has been accrued for the cash proceeds.*
